### a. Solid Waste Management:

#### *Solid Waste Management:*

Solid waste management aims to reduce the adverse impacts of waste materials on human health and the environment, supporting economic development and a superior quality of life. There are two types of solid waste: bio-degradable and non-bio degradable. Bio-degradable waste decomposes into compost for plants, while non-biodegradable waste is dumped into dumping yards. Dustbins are placed at prominent locations and classrooms, and lab attendants collect food waste from kitchens. The waste is strictly prohibited from being thrown away, and plastic bags are discouraged within the institute premises.

### b. Liquid Waste Management

In college, this is how we are able to ensure that discharges of waste into the watercourses are avoided; by collecting and disposing of hazardous liquids correctly. Well-built drainage systems leading to corporation drainage line. The drainage line is cleaned periodically as well to avoid any stagnant water; the cleaning part is outsourced.

## c. E-Waste Management

Management of electronic appliances is an aspect of the institutes IT infrastructural development. Examples include computers, printers, photocopiers, and UPS. Outdated or irreparable pieces of equipment are supplanted with new replacements. The e-waste scrap is collected and given to the authorized vendor for dealing with such waste. Assurance can be provided of possession of proper license regarding the handling and disposal of e-wastes by the authorized vendor.

To tie up with Computer scrap agency for E- waste products of college. Agency provided the registration certificate.
